

UnLtd India Sector Report

Accelerating Change: Tackling the Sustainability Challenge for Impact Accelerators in India & Beyond

Dear Friends and Supporters,

We are thrilled to announce the release of UnLtd India's first sector report, "Accelerating Change: Tackling the Sustainability Challenge for Impact Accelerators in India & Beyond."

The report addresses the pressing question facing in the social impact support space: What does sustainability look like for impact-first accelerators and incubators? We interviewed and analyzed 15 peer organizations across five countries (concentrated in India) in an effort to better understand the best practices around fundraising and market revenue generation. The report explores our key findings and collates best practices and innovative approaches from across the globe.

You can access and download the full report [here](#).

Help us spread the word!
